 **Danielle M. to Me**
On the unit 2 review worksheet, #1 & 2. What does it mean by "write your solution on the blank provided. What solution?"

🕒 Dec 17, 2012 · 💬 Reply · 😊 ▾

 **Erin C. to Me**
Hi Ms. Whittington. I'm working on the first part of the worksheet and I just converted pounds to ounces and there are 16 ounces in a pound and it said to convert 90 pounds to ounces. So do i just multiply 90 by 16?

🕒 Dec 16, 2012 · 💬 2 Replies · 😊 ▾

 **Me** · Dec 16, 2012
Yes

 **Erin C.** · Dec 16, 2012
Ok, thanks.

Alysa D. · Nov 13, 2012

but where do you find that do i type it in search ?

Me · Nov 13, 2012

Under the accelerate page there should be a tab that says folders. You will have to look around the find it.

Alysa D. · Nov 13, 2012

ok i found it theres alot of task which one do i do ?

Deandre F. to Me

on the back of the homework sheet i can only get straight lines on the back what am i doing wrong?

🕒 Oct 30, 2012 · 💬 1 Reply · 😊 ▾

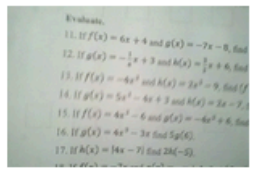

Me · Oct 30, 2012

Are you using the table button in the calculator? You might need to try different points besides -2,-1,0,1,2

Danielle M. to Me

Problem 16 & 17.

🕒 Oct 28, 2012 · 💬 1 Reply · 😊 ▾

Me · Oct 28, 2012

Plug in the number from inside the parentheses and figure out what the function is equal to. Then take that answer and multiply by the number out front of the a.

Danielle M. to Me

Im confused on how to work out number 16 & 17.
For 16, how do I plug that in? And
for 17, I dont understand how to work it out at all.

Oct 28, 2012 · 2 Replies · [Dropdown]

Me · Oct 28, 2012

I don't have the paper with me. Can you post it directly to the accelerated group page instead of a direct post to me. :)

Danielle M. · Oct 28, 2012

I thought it posted with it. :p Im sorry (:

Jacob M. to Me

16) $F(n) = -4n + 4$
 $g(n) = -2n - 4$
Find $F(n) / G(n)$
Do we just write it out?

Me · Oct 23, 2012

Yes. $-4n+4/-2n-4$

Next time post to our group. There is a better chance that your question will be answered faster.

 **Me · Sep 6, 2012**
domain is all of the x values that you can plug into the equation
range is all of the y values that you can get out of the equation

 **Dawson P. · Sep 6, 2012**
ok, thankyou

 **Deandre F. to Me**
I don't understand question #1,2,5. On part 2 of the cumlative task.

🕒 Sep 6, 2012 · 💬 2 Replies · 😊 ▾

 **Me · Sep 6, 2012**
See what I wrote for Ashlyn on the wall of the ACC group. Domain is the x values that will work
in your equation, range is the y values that you will get out.

 **Deandre F. · Sep 6, 2012**
ok thanks

Danielle M. to Me

Sorry . For example, number one is asking what values of "a" and "b" yield an exponential function to model the spread of the rumor of the soft store opening. What do it mean by a and b yield an eponential function ?

🕒 Sep 5, 2012 · 💬 3 Replies · 😊 ▾

Me · Sep 5, 2012

A= the initial amount of people who know about the shop
B= change factor (what are you multiplying by each time)

Danielle M. · Sep 5, 2012

Thank you.

Me · Sep 5, 2012

No problem. :)

Me · Sep 4, 2012

yes. Make a table and get some points. It doesnt have to be a work of art, just get the general shape of the graphs.

My mom told me to send this to you, i forgot to turn in my corrections today, but i had it done a few days before. I apoligize but i had my mind on the classwork. Can i still turn it in Monday?

Aug 24, 2012 · 2 Replies ·

Me · Aug 26, 2012

I do not accept late work, so unfortunately I will not accept it on Monday. Next time try to pay attention to when it's due. If I make an exception for you I would have to do that for everyone and I'm not going to do that.

Dawson P. · Aug 26, 2012

Lilly M. to Me

in number 7 do we distribute the negative sign to the $(6x-10)$ to get $-6x+10$?

Aug 20, 2012 · 1 Reply ·

Me · Aug 20, 2012

yes! it is like multiplying each term in the parentheses by -1 , so it would essentially just change the signs.
